RE: SNOW REMOVAL SERVICES –INDIAN BROOK FIRST NATION

Dear Band Members,

It has been brought to my attention that many Indian Brook community members are having challenges with Sipekne'katik Snow Removal Services. I wanted to advise that we have two separate crews providing Snow Removal Services, each with specific assignments.

Snow Removal Services for Seniors and Disabled

Snow Removal Services for Seniors and Disabled community members driveways has been assigned to our Housing Department. It has been identified that it will take an estimated eight hours from when snowfall stops to complete Snow Removal Services for Seniors and Disabled. This means, if the snow stops at 8:00am all driveways on this list will be serviced by or before 4:00pm. Snow Removal Services for Seniors and Disabled will start with driveways down the meadows (Eagle Nest Road), working their way to the other side of Indian Brook (Near the Apartments). If you have a medical appointment or an emergency, please contact **Michael Paul at 902 805 0155 to have your driveway serviced immediately.**

Main Roads, Community Buildings, and All Other Driveways

Snow Removal Services for all main roads, community buildings, and driveways that are not on the Seniors and Disabled list as been assigned to our Operations and Maintenance department. After speaking with our Operations and Maintenance Snow Removal team, they did advise it could take up to three days after snowfall ends to complete all roads, community buildings, and driveways.

Providing Snow Removal Services is a new endeavour for Sipekne'katik, and we appreciate your patience and understanding as we work through our implementation phase.

Sincerely,

Nathan W. Sack, Director of Operations
Sipekne'katik Band
